

FINPRO
Education

Company	Description
	<p>Claned is a collaborative online learning platform that utilises machine learning to understand how different individuals learn. It personalizes learning to each individual optimizing study motivation and improving learning results. Claned applies artificial intelligence, theories of education psychology and Finnish education pedagogy revealing what factors impact individual learning. In Claned students can build their own individualized learning paths, track their progress, collaborate with peers, act and adjust learning habits. Claned is compatible with every data terminal equipment. It is a content agnostic platform and benefits educational institutions and commercial organisations alike, as well as public authorities and NGOs.</p> <p>www.claned.com</p>
	<p>NOT A BAD IDEA NOT A BAD IDEA develops digital learning environments for entrepreneurial learning. Its experts are internationally recognized in EU, OECD and the UNITED NATIONS. Their research-based development, focusing on modern, specific and student-motivating practices, gives a solid basis for their products, consultation and training.</p> <p>www.notabadidea.fi</p>
	<p>Seppo is a very easy to use tool for all teachers to create and share educational games. Unlike many others, Seppo is not a single game but a platform that can be used in every subject and at all school levels.</p> <p>Most of the games are played in the real world settings outside the classroom. A lot of teachers are using Seppo also to gamify their lessons inside the classroom. The idea is to change phones and tablets into productive devices. Players can answer to the questions with text, pictures, videos or audio files. Students will learn not just the subjects but also collaboration, problem solving, critical thinking and producing their own digital stories. Our approach is pragmatic but based on the pedagogical research and the Finnish educational expertise.</p> <p>http://seppo.io/en/</p>
	<p>Finnish early childhood education focus on bringing up happy learners with robust social skills, ready to adapt to the school environment in a successful way. Finhow is a private company, successful in early childhood education, wanting to bring the Finnish way of thinking and doing to your local nursery schools. We base our work on the Finnish early childhood education and care-curriculum. We offer a one-year, full concept training, a one-week taste of Finnish early childhood education, and a simple e-learning tool for starting to learn English in monolingual nursery education. Our training programs are developed in our own nurseries and can be tailored to local customs and needs. We hope for private or public cooperation in developing nursery operations through the Finnish model.</p> <p>www.finhow.fi</p>
